## EXPERIENCE

### Earlybean, Lagos, Nigeria(Freelance) — Frontend/*Mobile Engineer*

May 2019 - present

I am currently building a fintech mobile app for a startup using React-Native, Apollo-GraphQL, I have developed the following screens and functionality

- App welcome screen
- User signup screen and functionality
- User login screen and functionality
- User verification screen and functionality with OTP
- User dashboard screens
- Integration of custom fonts and icons

### Andela, Lagos, Nigeria(Remote) — *Frontend Engineer*

July 2019 - march 2020

I worked in a distributed team as a frontend engineer to develop an in-house product (**Hall of Fame**) using React/redux.

I developed the following features:

- Created the view for a user profile page.
- Added the functionality for users to be filtered by their cohort on the dashboard.

### Andela, Lagos, Nigeria(Remote) — *Technical Team Lead*

Aug 2019 - Sep 2019

Performed code reviews and provided support to ensure code quality.

Performed daily check-ins/standup to monitor the team progress and provide help where needed.

### Andela, Lagos, Nigeria(Remote) — *Frontend Engineer*

Fab 2019 - June 2019

I worked in a distributed team as a frontend engineer to develop an in-house product for managing and booking meeting rooms using React/Apollo-GraphQL.

While working with this team, I developed the following features

- Created a UI for displaying all meeting rooms.
- Added the functionality for viewing a meeting room's activity.
- Created the UI for an Admin to view a list of rooms assigned to a resource.
- Created the UI and added the functionality for an admin to edit a room.
- Added the functionality to populate the analytics activity page with data from the backend

## SKILLS

**Frontend/Mobile Development**

**RESTful and GraphQL API Development**

**Test-Driven Development.**

## TECHNOLOGIES AND TOOLS

### Languages

Javascript/Typescript.

### Styling Tools

Html, SASS, CSS, Emotions.

### Front-end Frameworks

React.js, Redux, GraphQL-Apollo.

### Back-end Frameworks

Nodejs, Express.js, GraphQL.

### Mobile Frameworks

React-Native.

### Testing Tools

Jest, chai, mocha, superTest, Enzyme, React-testing Library.

### Database Tools

SQL, PostgreSQL, MongoDB, Redis, Sequelize, and Mongoose.

### Version Control

Git, GitHub.

### Automation Tools

Webpack, yarn, npm, Parcel.

I participated and contributed to several system designs and analysis session while working on this project.

I participated in code reviews sessions.

### Andela, Lagos, Nigeria — *Full-stack Engineer*
Nov 2018 - Feb 2019

I was part of a team that built a performant and high accessibility app that helps authors pen down, develop and publish their thoughts. We developed the app with Reactjs/Redux (frontend), Nodejs/Expressjs (backend) and PostgresSQL.

I developed the following feature:
- Created the Backend API and Frontend view for a password reset.
- Created the Backend API for highlighting and commenting on a text.
- Created the Backend API for Pagination support on the home page.
- Implemented Backend API for role-based access control functionality.
- Linked GitHub repo to pivotal tracker board.
- Created the view and functionality for Social Authentication.
- Created view and functionality for users to be able to update their articles.
- Added the functionality for users to be able to like a specific comment on an article.

I participated and contributed to several system designs and analysis sessions while working on this project.

I participated in code reviews sessions by reviewing my teammate's code to improve code quality of our codebase.

### Web Dreamcast, Onitsha Nigeria — *Fullstack Engineer*

Fab 2017 - Sept 2018

I worked in a team of four as a full-stack engineer to develop a fast food application that enables users to place an order for food online. The application was built with React/Redux and Nodejs.

### Adax, Enugu Nigeria — *Intern*
July 2014 - December 2014

I was part of a team of 3 that developed the prototype and algorithm for building an intelligent traffic light system.

## EDUCATION

### University of Nigeria, Nigeria — *B.Eng*
Electronic Engineering

Nov 2010 - July 2015

## CI Tools

CircleCI, TravisCI, Coveralls.

## Deployment Environments

Heroku, Netlify.

## Collaboration Tools

Git, Slack, Pivotal Tracker.

## Mockup Tools

Invision, Figma

## Methodologies

Agile Scrum.
